

EvaStore Limited - Environmental Policy

EvaStore Limited (ESL) acknowledges the environmental impact of its business operations and recognises the importance of a commitment to the continual improvement of its environmental performance.

This Environmental Policy outlines ESL's responsibility to minimise its environmental impact and should be fundamental and integral to all business operations.

Where possible, ESL will monitor and manage its consumption and use of natural resources and other materials and will work towards both minimising the company's reliance on non-renewable resources and also avoiding the use of any hazardous substances when undertaking business operations.

This Environmental Policy will be referred to for any decision making for business operations and will be reviewed at regular management review meetings.

Energy

ESL will monitor and manage its consumption and use of energy. We will work to reduce the consumption of energy and to reduce our contribution to emissions of gases and other pollutants which are believed to contribute to climate change.

Water

ESL will work to reduce the consumption of water within our facilities.

Waste

ESL will work to reduce the volume of waste generated from its business operations through our "4 R's" initiative:

1. Reduce. Consider what we buy and how we use it.
2. Repair. Consider repair wherever viable rather than replacement.
3. Re-use. Any materials where possible.
4. Re-cycle. Any waste or output from our services where feasible.

Transport

ESL will monitor and work towards economising any logistics or travel undertaken for business purposes, and thereby aim to reduce its emissions of gases and other pollutants which are believed to contribute to climate change.

Procurement

ESL will seek to undertake sustainable procurement actions through auditing sub-contractors on their own environmental policies and practices. Through this process ESL will aim to purchase goods and services which minimise, or have been assessed for, their environmental impact. ESL will use local suppliers whenever feasible. ESL will encourage all suppliers or subcontractors to commit to improve their own environmental performance.

Customers

ESL will promote environmental good practice to its customers, encouraging a shared responsibility to protecting the environment.

Employees

All members of staff are introduced to ESL's Environmental Policy on employment with the company. During their employment staff will be granted access to ESL's Environmental Policy through the Company's controlled documents register. ESL recognise the responsibility staff have in contributing to good environmental management and will seek to harness and channel any enthusiasm and interest shown by staff and will provide appropriate information and support to ensure that all staff exercise their duty towards the environment through Company's Environmental Policy.
